

ISAAC GOH YONG CHEE

HP: 8797 5499 ycgoh.isaac@gmail.com

I'm an NUS Computer Engineering and Innovation & Design undergraduate who thinks like an engineer and builds like a designer. My experience spans systems development (Microsoft PowerApps, embedded and controls systems) and hands-on creative work — 3D modelling and printing, graphic design, branding — a combination I've used to ship prototypes, run a small business's design and marketing, and place top 16 at NUS IDEATE. I'm looking for an overseas immersion at an early-stage startup where that same builder's instinct — technical, creative, and resourceful — can help solve real problems fast.

EDUCATION

2025 - Current National University of Singapore; Double Major in Computer Engineering and Innovation & Design
GPA (as of Year 1): 4.56

2021 - 2022: Anglo-Chinese Junior College; Rank Points: 86.25 (H2 Mathematics, Physics & Computing)

2017 - 2020: Nan Hua High School (Physics, Chemistry, Higher Art, Elec. History)

SKILLS AND COMPETENCIES

An all-rounder across engineering, design thinking, and visual craft:

- **Engineering & Technical:** Computational thinking & problem-solving; Python, C, C++, Microsoft PowerApps, Verilog
- **Design Thinking & Innovation:** Design thinking & value creation, from ideation through to prototyping
- **Visual & Multimedia Design:** Autodesk Fusion 360, NomadSculpt, Procreate, Microsoft PowerPoint, Adobe Illustrator, Adobe Photoshop
- **Leadership & Communication:** Team leadership & mentoring; Presentation skills

UNIVERSITY MODULES (CURRENT SEMESTER)

- CDE2300 Product Design & Innovation
- EE2026 Digital Design
- EE2211 Introduction to Machine Learning
- CS2107 Introduction to Cybersecurity
- ES2631 Critique & Communication of Thinking & Design

UNIVERSITY MODULES (COMING SEMESTER)

- CDE2501 Sustainable Systems for Liveable Cities
- CG2023 Signals & Systems
- CG2027 Transistor-level Digital Circuits
- CG2028 Computer Organisation
- CG2271 Real-time Operating Systems
- CS2113 Software Engineering & Object-Oriented Programming
- CDE3301 Ideas to Proof-of-Concept

EXPERIENCE AND ACHIEVEMENTS

2026

Internship at Universal Studios Singapore Technical Services (Resorts World Sentosa)

- Completed 3-month summer internship as a Controls Engineer Intern
- Focused on the reopening of Water World attraction, with additional attachments during ride repairs and maintenance. Gained experience and understanding of the park's protocols, ride operating systems & networks, and mechanical systems.
- Contributed to the creation and improvement of an Engineering Request / Engineering Change Notification system for the Technical Services and Document Control Team; identified inefficiencies in the current system and designed new system architecture for the new system to be built on Microsoft Powerapps.
- Secured subsequent internship due to excellent performance and good team rapport.

2023-2025

National Service

- Completed National Service in 2025 with Corporal (First Class) rank and Outstanding Overall Performance

2021-2022

Anglo-Chinese Junior College

- Class Vice-Chairperson: Conducted student-led discussions such as National Education Lessons. Liaised with external organisations for Values-In-Action (VIA) activities (volunteer meal distribution with Meals on Wheels).
- College Choir Bass Section Leader: Provided mentoring and guidance for peers in the section. Contributed actively as a member of the Executive Committee. Spearheaded a new initiative to teach essential techniques and basic music theory to new members with no prior choral experience by planning and hosting a 2-day workshop.
- Orientation Group Leader: Volunteered to facilitate orientation camp for incoming JC1 students. Key designer in the camp media committee, where I designed the orientation T-shirt and publicity material.

2018 - 2020

Nan Hua High School

- Choir Chairperson: Coordinated logistics and planning for performances, CCA camps, VIA activities, and weekly practice sessions.
- sKy Leaders Programme (Talent development programme for high achievers): After graduating in 2023, I returned as an alum to assist in the planning and hosting of the inaugural prototype Model United Nations conference named the National Youth Environment Council (NYEC).
- National Youth Achievement Award (Silver) (NYAA): The award required participants to embody and record acts of service learning, outdoor appreciation, healthy living, and community initiative over a 12-month period (vetted by assessors).

PERSONAL ACHIEVEMENTS & PROJECTS

- Standard Chartered Marathon 2024 & 2025 finisher, completed in 4 h 49 min & 5h 45min
- Co-Founded and Ran Endurance Run 1, a Community Run Club (~1 year)
 - Co-founded and operated a run club with regular meet-ups and events, from initial concept through winding it down after about a year.
 - Led weekly planning for logistics and scheduling of club activities (running routes, refreshments, publicity & marketing, merchandise, collaborations)
 - Owned brand identity and merchandise end-to-end: designed motifs and graphic elements, sourced suppliers, and managed the fabrication process.
- Semi-finalist for NUS IDEATE 2026
 - Achieved Top 16 placement in NUS's annual innovation makeathon.
 - Contributed skills and expertise towards competition deliverables, including but not limited to rigorous ideation, prototyping, interviewing of target audience, and filming & editing of video submission.
 - Specifically handled 3D modelling and 3D printing of multiple prototypes as the team's only engineering member.
- Freelance Graphic Designer, KWOH Distributions
 - Designed and refined multimedia assets on a freelance basis for client-requested projects.
 - Worked on designs used for multiple events and organisations (e.g. NUS School Of Computing Freshman Orientation Week T-shirt designs)
 - Assisted in ideation and creation of social media promotional content to expand outreach for the business
